No. 22

Col. W. M. Hoge, of Boonville, Mo., tution. The importance of this business association to the school intercan hardly be over-estimated.

In this way Col. Sellers' own investment in the school is safeguarded by the possession of a younger partner, the labor and responsibility is divided, and the perpetuity of the institution still further assured.

Col. Hoge needs no introduction are at all acquainted with educational matters. He received his preparatory training under Prof. F. T. Kemper, Their macadam does not seem to be perhaps the most famous of the educators of Missouri a quarter of a century ago. He is a Master of Arts of the University of Missouri and was selected by Prof. Kemper as his assistant in the work of education he then had in hand. In addition to his experience in the school room, cover- however. PARTNERSHIP IN SCHOOL WORK, of the Examiner, the City Engineer and one personal friend, no particular CENTRAL individuals were songht out, but the business men were interrogated at of Wentworth Military Academy with was found, though it was said there Col. Sandford Sellers and an equal were some. The unvarying testipartner with him in the ownership of mony was that macadam streets kept other private interests in that insti- more than brick streets. The only objection made to brick paving was that it is noisy in dry weather; and ests of Lexington and especially to this as an offset it was offered that the future of Wentworth Academy lime dust from macadam streets was even more offensive during the same seasons. The uniform advice was either to patch up the old macadam

A careful inspection revealed the fact that their old macadam streets are very much worse than ours; the ones built last year, injexcellent conanywhere in the state to people who dition; their brick street, which has not been cleaned since it was laid, was clean and crossable at any place. very good. Like ours, it is half magnesian limestone, which is more or less soluble in water.

There can be no question as to the reliability of these facts about the experience of this one place. Careful men should not be satisfied with this price for macadam, it is said, was 70 cents per square yard. The thick-Macon the cost of brick was \$1.40, near by.

Street Improvement.

At Warrensburg part of the prinof the Academy will rejoice to know cipal down town streets are paved that it enters upon the work of a new with brick and contract has been let school year with all the impulse that for several blocks more to be put comes from high hopes and confidence down this summer. The contract price for the part already paved was \$1.58 per square yard and for the part to be paved \$1.60. The first One of the reasons why the neople paving was done by a contractor who kind of streets they get, they will majority of the property holders on have to pay for in the proportion of the residence streets to agree to brick thus appears that the paving of South City and made a study of the street street is nobody's business but the situation there. The above program, as given in the

GREATEST MISSOURI FLOOD.

This week of flood on the Missouri river has gone far beyond the record - Richard Harding Davis, of any previous year in point of destruction. No fair basis of comparison exists. The river reports of the water stages in the flood of 1844 What's the Difference, O. F. Pearre, and the flood of 1881 are of very doubtful accuracy. At these dates Grandma Keeler Gets Grandpa Keeler the channel of the river was much Ready for Church, S. P McLean, narrower and the banks lined with cities, towns, farms, gardens and stock

> According to reports circulated here the present flood reached a height of 331 inches greater than that of 1881. - . . Gielow. Though the water has been falling for three days it is still higher than The destruction of property cannot be computed. People on this side of the river who own farms in Ray county. have yet no definite information of what part of their stock has been driven to places of safety. In most cases their tenants cannot be located. Those who have visited their farms in skiffs found their barns, granaries, sheds and housetops covered with chickens, rabbits, skunks, coons, snakes and all other forms of domestic and wild animal life belonging to the amity. It is believed that fences are all swept away. The river at this place extends from bluff to bluff-a distance varying from four to ten miles. The depth over the bottoms is from two feet to ten. The ferry boat was overturned and sunk.

School Board Meeting.

At a meeting of the board of education Wednesday night the usual routine business was transacted. The teachers of last year were reelected with a single exception. Miss Edith Marrs, who resigned during the last session on account of Illness and was succeeded by Mils Florence Hall, was elected to her former position in the Arnold school. Miss Hall was not an applicant.

Following are the teachers and

Superintendent C. A. Phillips, \$1400.00; Principal High school Florence W. Arnold, 55.00: assistant Annie Allen, 45 00.
